

Too much heat from the fridges and the pie warmers!

Heat Pumps!

We can help

See the story below

Relief from heat!

Dhirubhai Chauhan of Dawson Road food Market seen with the recent installation of the heat pump/air conditioner in the back ground. The extreme heat produced by several fridges and the hot weather and the melting chocolates was too much that it prompted Dhirubhai to install a cooling system to solve the problem.

What are Heat Pumps?

Heat Pumps create a comfortable living /working environment for your homes, offices, shops etc.

- * Heat Pumps work as an air-conditioner when the temperature of the air is too high and supplies cool air to the hot area.
- * Automatically adjusts as a heater when the air temperature drops too low.
- * Heat Pumps are amongst the most efficient heating and cooling options on the market.
- * Comfort all year round, day or night, just by press of a button!
